

Poor people will pay zero taxes under the FairTax.

In today's "Income Tax" system, the poor pay those 22% embedded taxes every time they make a purchase.

Under the FairTax, every US citizen will receive a prebate check that will pay their taxes up to the poverty level. A family of four will receive over 525 dollars a month.

Social Security and Medicare are going Bankrupt. Under the FairTax they both are funded 100% forever.

Interest rates will be lower because banks will also be more efficient without those embedded tax costs.

The FairTax plan was not dreamed up overnight by some politician. The FairTax was designed by a team of Accountants and Economic Experts over a period of years of research and study. The FairTax is a dollar for dollar replacement of our Income Tax system.

The FairTax is not a "Republican" issue and it is not a "Democrat" Issue.

The Fair Tax is an "American" issue.

A lot of politicians love our income tax system because they can hide the cost of their spending that they use to buy votes. These politicians will fight the enactment of the FairTax, which calls for abolishing the 16th Amendment, because they are in it for the power and prestige. Honest politicians, true servants of

the people, will support the FairTax, and some are already sponsoring legislation in Congress to do just that, HR 25 in the House and S 296 in the Senate.

Go to www.fairtax.org or buy the book *The FairTax* and find out for yourself: then educate your neighbors and contact your congressman.

The FairTax

A Permanent Economic Stimulus (cost - \$0)

Brings Jobs back to the USA

Funds Social Security Forever

Poor man pays ZERO taxes

Trillions freed up to invest in the US Economy

No more penalty for working harder

Politicians lose their power to buy votes

Never file another Income Tax Return

More power to "We The People"

Less power to Politicians

Find out more at www.fairtax.org

Jobs Jobs Jobs Jobs

The FairTax

A Permanent Economic Stimulus

American Jobs have been moving to other countries for years. How would you like this to stop, and not only stop, but those jobs start coming back to America?

The FairTax will do just that. 500 companies in Europe and Asia were asked "what they would do if the USA installed the FairTax?" 400 said they would build their next plant in the USA. 100 said they would move their entire operation to the USA.

Also, under the FairTax, when American made products are to be "exported" to another country, the price will be 75% to 90% of the price today. More products will be sold, creating more jobs for Americans.

There are over 13 trillion dollars of legally made money in offshore accounts owned mostly by corporations. This money was earned in foreign countries and the proper taxes paid there. If they bring it into the USA, they will have to pay taxes on it again. That's why it's there and not here.

Under the FairTax, they would be free to bring this money into the USA and invest it into our economy with no fear of it being taxed away as income.

JOBS AND JOBS ONLY are the key to a vibrant economy and a prosperous citizenry. When people have jobs, they spend money and the wheels of the economy turn. When people do not have jobs, those wheels slow down and at some point come to a stop.

Under today's income tax system, people are penalized for working more. The more you work, the harder you are taxed. Businesses are handicapped by the extra cost of the embedded taxes in the price of all of their raw materials. This drives up their cost, which is passed on to the consumer in the price of the product on the shelf. It is impossible for a business to absorb the taxes they pay, without a profit they close the doors and the jobs are lost. Taxing a corporation or any business is just another way to hide a tax that the citizen gets to pay.

Under today's tax system, we pay our income taxes and, when we buy our food, clothes, toys, etc., we pay the corporate taxes of all the businesses who had anything to do with the making of the product and at the same time we are paying our income taxes again because they are also embedded in the price of the product. A real nice system, huh?

The FairTax **How It Works**

The FairTax replaces our “Income Tax” system with a tax on “Spending”

Actually, a tax on spending was the only “Legal” means of taxation set forth in our Constitution by our Founding Fathers. Only through deception did our politicians in 1913 make “Income Taxes” legal through the 16th Amendment to the Constitution. They then installed a simple “Flat Tax” on the rich, which grew into the 67,000 page monstrosity we have today. The income tax crushes our ability to compete in the world marketplace: and on a personal level; the harder we work, the harder we are taxed.

The FairTax will erase all Federal Income taxes, Social Security and Medicare taxes, corporate and business taxes, estate taxes, and gift taxes. April 15th will be just another beautiful spring day, because you will **NOT** be filing income taxes ever again.

Look on your paycheck stub at the Federal taxes, Social Security, and Medicare taxes taken out of your paycheck,

they will no longer be deducted from your pay, these dollars will be added to your paycheck.

In today's “Income Tax” system, 22% of the cost of American made products are taxes embedded in that cost. When the FairTax goes into effect, most all of this 22 cents in every dollar will go away. Not all of the 22 cents will go away because those extra dollars in your paycheck are part of the 22 cents.

The FairTax replaces these “income based” taxes with a retail sales tax on new goods and services at the rate of 23 cents of every dollar. The tax will already be included in the price on the shelf and your receipt will show how much of that price was taxes.

The prices will be a little higher, but your paycheck is going to be higher more-so.

There will be NO TAX on used goods whatsoever.

We will go from 160 million income tax payers to over 350 million sales tax payers, including the criminal underground economy and the 50 million tourists who visit our country each year.
