

MEALER 2012
U.S. Immigration Policy
Touching on Education & Welfare & Drug Policy

To be clear from the start, I do not stand with lawbreakers, special interests or illegal invaders or terrorists and drug dealers, **but America needs a way to make money, rather than spend money in dealing with these issues.** Especially with illegal immigration.

Many American who have emigrated legally to the United States have put out a great effort and followed the straight and narrow. We must applaud them for their honesty. However, many more have over-stayed their visas or work permits and have become entrenched in living in America. Chicago, *for example*, is full of decent hard working Poles who came from Poland and fit this criteria. They fear that going before the Immigration Board will certainly get them deported to a place where they have no home, no job and literally, little to no chance of survival. They are not “stealing our jobs”.

It's those crafty Canadians we must watch out for, eh!

Access to Legal Immigration entering through Mexico is actually a major issue and not the assumed fact that migrant workers are entering the US, solely to “wreak havoc” or “steal our best jobs”. The idea of an illegal migrant workers running amok and causing trouble stealing great paying jobs in the USA is not only false for the most part, but an insult to the very principles of the American way.

The Mexican Government **intentionally** confuses, denies access to information, and avoids their US migrant worker's *ability* to garner either Visa or to apply for US citizenship. This forces a few-million illegal workers (at one time, hundreds of thousands entering the US both illegally and dangerously per month) to earn money and send it back to Mexico for their family members to spend in Mexico. **This is also a huge part of the Mexican economy.**

Although the Mexican Government **does not** issue Visas, the Mexican Government does encourage illegal immigration. The process to garner a Visa to the US alone takes time and that makes illegal entry all that much more of an opportunity. Follow the link below and begin completing the questionnaire, if you'd like to see the steps needed for Mexican citizen migrants go through *unless, of course they are planning on being illegal aliens*. **Keep in mind this does not include those who are not Mexican citizens yet have traveled illegally through Mexico expecting an easy trip to working in the USA...**

<http://www.legallanguage.com/immigration/mexico/guidemexico.html>

As stated above, migrants from countries further south of the border are tricked by the human trafficking groups into giving up their possessions, paying outrageous fees and being smuggled into the US, quite often being forced to ‘mule’ drugs into the states to pay for their passage or ransom for family members who are held captive in stash houses across the US. This is the main cause of illegal immigration and reason so many potential US citizens become illegal aliens.

To be VERY CLEAR, THE TOTALITY of INDIVIDUALS WHO ARE NOT AUTHORIZED TO WORK IN THE UNITED STATES WERE PAID \$4.2 BILLION IN REFUNDABLE CREDITS, and that has now become a huge part of our National Debt in basic entitlements. This is not just a wild scenario, but news directly from the US Treasury dated July 7, 2011.

Please see- <http://www.treasury.gov/tigta/auditreports/2011reports/201141061fr.html> and while this problem may seem complex, it too, may be remedied with the FairTax,  .

The MEALER U.S. Immigration Policy will, without a doubt create millions of US jobs for Americans, in a series of privately owned and built "motels" which join US Visa and Immigration stations (which are in essence are decent, huge, secure and safe ‘motels’)

between spaces of no mans land and the soon to be **full length privately built border fence** along the border in Arizona, New Mexico, Texas and of course California.

The main drug and trafficking routes no less... This ties in very well with the MEALER DRUG POLICY [<http://mealer2012.com/drugs/>]. The reason we go with a partly privately built 'fence', is because businesses will use the advertising campaigns and direct business exposure which will inevitably make up the new border "fence." Not only literally in many cases, but as portions of their own businesses.

All in the theory of mid-1800's US immigration, except with thousands of rooms for short-term rent (much cheaper and safer than paying a "coyote" to drop the migrant in the desert), while migrants apply for and possibly gain Visa or US citizenship. Complete with Ellis Island styled citizenship tests and sworn oath of allegiance (in English). This process creates more American jobs and will be a convenient place for the soon-to-be defunct federal jobs when the current Federal Budget is halved and re-arranged.

English would be taught and encouraged as part of the citizenship with a very clear reasoning that, "English is a necessary language for new US citizens in order to gain good jobs and negotiate like every other English-speaking American may negotiate throughout America and, of course, as they deal with the world and advance with military & business" connected with the Mealer Economic Initiative. Speaking multiple languages is a huge benefit for migrants to the US, whether from Mexico, the Honduras, Poland, Russia or anywhere else.

The farms that cross into Mexico which are in a state of trust with the Mexican Gov't on the Mexican side of the border are a main route for coyotes to lead their migrant workers "aka; illegal aliens" and worst yet, the drug packing 'mules' from Mexico across the US, will be left open (as they choose), but the US side owners may just as easily sell/lease part of their farms bordering the 'pick-up point' roads that the "illegal aliens" are headed for. Under the Mealer Plan, these sold of portions will also become both border patrol off stations with the immigration motels and/or regular businesses that are patrolled by federal and state officials. Containment is the key, as no big time drug runner wants to become a legal US citizen under the watchful eyes of the law. Electronic surveillance is another huge reason that will benefit from private 'off-the-beaten-path' businesses.

This certainly beats a moat filled with alligators and the **Mealer Immigration Solutions actually create decent American jobs, grows our infrastructure to provide a solid state & federal tax base.**

The migrants and now jobless illegal aliens across America who have attempted to enter the country illegally more than once and as such are federal felons (**excluding Arizona where SB 1070 grants them 3-strikes with mere misdemeanors and later with fines**), will be granted a full reprieve ONLY from the past transgressions of illegal entry and allowed to register their names, locations, etc., as they begin the *Ellis Island On Dirt Project* en route to US citizenship. **No amnesty whatsoever, just a legal reprieve from their prior illegal entry violations.** During this time, they are not US citizens and not given state or federal health care (except emergency of course) or welfare, except for a child's education. The concept of anchor babies to non-US citizens is an unconstitutional issue and thus moot.

Foreign felons and child molesters will never be accepted into the US, as according to current law, so by this method, it may be assumed that any migrant NOT registering to begin the Visa and/or citizenship status is not a practical choice for US citizenship or visa status in the future and will be deported to their country of origin. If that country no longer exists, will be sent to the soil of that where

that country once existed or placed into the US legal system for consideration of rehabilitation, or justice.

Oddly, more than half of all Americans (**most calling themselves Conservative**) cannot or will not comprehend the fact that many migrant workers and other illegal aliens have worked in the US for decades and have paid their withholding taxes, as well as paying local property taxes (in rent or otherwise) and fuel taxes and sales tax, yet have no ability to apply for a state or federal income tax refund, welfare or unemployment benefits (when needed). This being the case, the very idea that the “*evil, welfare receiving, illegal aliens with their anchor babies*” and children are entering the schools for free is absurd and flat-out wrong. We have grown up as friends and acquaintances with many of these undocumented worker’s children.

Coming down hard on those who hire undocumented workers is a must, because without, at the very least, using E-Verify and other more carefully constructed safe hiring programs we may as well forget border protection. If the US is to perceive to control illegal immigration and unlawful hiring practices, we have no other option besides mass deportation. Which is not a viable option due to the overwhelming cost.

Mega-corps (aka.; transnational conglomerates who destroy American small business) are taking advantage of lower wages and heavy workload [IE. slave labor] and essentially support human smuggling because that is what the hiring of undocumented workers is all about in the business world.

Of course, to protect the unwary investor, protections that allow them to stay at arms length of the legal ramifications of illegal hiring, a variety of employee check points must be available and in place. This is what board meetings are all about and allows any business owner to know exactly what is going on in his or her business.

When a company profits from the exploitation of the American workforce, by hiring undocumented workers, everyone but the employer loses. Simply put, *this must not continue!*

Special Interest groups, lobbyists and the current status quo running Washington DC today will no longer be tolerated. Corporations that hire undocumented workers ideally will not be fined or punished, INSTEAD after multiple violations and a series of fines, the business must be seized by the US and business assets confiscated. It’s time to pay attention and use E-Verify before investing in criminal activity and reckless business environments.

Due to the human trafficking and human rights violations, not to mention the corruption created that has destroyed America’s workforce, all board members, managers, company investors or profiteers as participants in criminal activity **resulting in** murder, racketeering, gross child abuse, endangerment, human trafficking, etc. must be held accountable. This alone will put a stymie on border town drug violence and import-export black marketed goods that are invading our country and further destroying American investment in American businesses.

This is a National Security risk and must be treated as such.

FURTHER; These actions are authorized to the POTUS alone in matters of necessity within the US Constitution at Article I, Section 8, paragraph 4: *To establish an uniform Rule of Naturalization, and uniform Laws on the subject of Bankruptcies throughout the*

United States; AND paragraph 9: To constitute Tribunals inferior to the supreme Court; AND distinctly in paragraph 21: To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

In many cases, the Mexican, Colombian, Afghanistan, et al. drug cartels are capturing and/or hiring desperate and uneducated children who have no other opportunities to run the cartel's drugs and to kill when commanded. They occasionally grow past puberty and become scum-of-the-earth killers. This, of course, leads to the current drug wars and border wars that are creeping into the USA.

Phoenix, Arizona is the drug related kidnapping capital of the world because of this and Maricopa County Sheriff Arpaio and the AZ legislature are fighting to save both the lives of the stash house victims and their families while fighting the OTHER half of the Americans (**most calling themselves Liberal**) who simply cannot comprehend the extreme safety factors involved and are unwilling to allow the law to keep people safe because they are offended by what is considered profiling. These Liberals unwittingly cause more migrant murders than they save and still turn to blame it on those who are keeping the peace and offering the migrants multiple chances to enter the US legally.

In my opinion, it is far better to be profiled while you are alive than to have to identify aka, profile your children if and when they have been murdered during drug and reactionary violence and other gang related crimes.

This same concept fits well with airport security... If a potential airline passenger has a problem with basic security (not the groping children and old women), then hit they may hit the road... America looks great from the Highways and Byways.

Recap of this Plan:

1. Common sense and widely accepted immigration restructuring (not reform, never amnesty).
2. New job creation, new semi-qualified workforce for Mealer Economic Initiative (because we will need a larger workforce).
3. A work place to put many newly hired 2009 federal employees when their jobs end in 2013 without we US taxpayers being required to pay entitlements on a "retired" 30-something year old 'ex-federal-jobber'.

The Mealer Immigration Policy must also become a National Security Issue.

MEALER 2012 carries a hefty Theodore Roosevelt "We're all Americans, not hyphenated Americans" stance, and a Ronald Reagan, "No mincing of words" discipline.

MEALER DRUG POLICY

Very Simple... Today, the government employs millions of people working to fight the drug trade into the US. The US government also makes a lot of money from the taxes paid back to the US coffers by the drug agents and related agencies dealing with the War On Drugs. It's not working for the average Joe, but it is certainly working well for the tax base and the drug cartels. **Legalizing the drugs is a bad move... Decriminalizing dangerous drugs is flat out bad planning for our Posterity.**

Unless you're a drug user or addict, dealer or supplier simply because the black-market would still account for the majority of the drugs being used and very few addicts want to be told they are addicts or users and buying and paying taxes on their hidden secret is simply not going to happen.

Constitutionally, the US public Must Not be held accountable for future care of an addle brained crack-head from meth., or another destructive illegal, legalized, or decriminalized substance.

Here's the solution at Step #1:

"President" MEALER DRUG POLICY.

The US would have an open agreement for any immigrant or current US citizen whether in the US illegally or legally and carrying illegal drugs to voluntarily go directly to any US Customs agency (Border Patrol), the nearest sheriff, police department or courthouse and without being charged with drug smuggling, to be granted asylum and given a substantial finder's fee every step they can direct the officials up the ladder to the heads of the dealers and cartels.

These new informants would be rewarded for turning in all information related to their drug connections within the US or any other country in accordance to how far they can place the illegal drugs origination.

CASH FOR PUSHERS?

The informants identity (and his/her family) will be changed and the US and Mexican governments will work together to take out each drug dealer up the chain to the Motor Pools, Money Handlers, Drug Handlers, Stash House Sitters, Bookkeepers, the Cell(s) Head(s), Cell(s) Director(s), Transportation Operators, Financial Advisers, and of course the Cartel Principals, not to mention the growers, harvesters, etc...

This MEALER DRUG WAR ACT alone would destroy the trust and coercion used by the drug gangs and cartels and they would implode.

Of course, if the "informant" is merely selling his/her dope to the authorities with bogus information, they wind up in jail or their name branded as an informant and deported to the country of their origin. The US and Mexican drug task forces would be saving valuable resources and tax payer dollars, not to mention stemming border wars, simply by using hands-on informants while also stifling the flow of drugs into the US.

Step #2:

Is of course, spreading the news throughout the Drug Cartels' forces and drug routes from Columbia to Afghanistan to Europe. Road signs work as well as TV ads. **Are you comprehending the amount of distrust this will cause?** The use of threats means nothing because the threats to drug dealers, users, drivers, etc., is all in question because the loyalty is in question 100% of the way.

2012 is fast approaching as are deadlines to put me on your state ballot, so let's work together.
